Your Single-Source for Outstanding Electrical Solutions

Dynalectric Company (Colorado) offers a complete selection of commercial electrical services for clients in virtually every market. From integrated communications networks to responsive building automation to the latest power distribution technology, our technicians can plan, design, install, and maintain an extensive range of electrical systems and components.

Innovative Solutions to Meet Every Electrical Challenge

Whether you need conceptual budgets, value-engineered options, design-build services, or fast-track construction, we have the customized solutions and innovative construction management methods for virtually any job. No matter the challenge, we strive to meet the most exacting standards and rigid specifications of your electrical construction and facilities maintenance projects.

Smart, Efficient Project Completion—from Design to Construction

Our suite of electrical services is backed by extensive preconstruction, prefabrication, and BIM capabilities. From early conceptual stages through design completion, we collaborate with developers, owners, architects, engineers, and general contractors to improve transparency and efficiency. BIM and prefabrication are leveraged throughout the process to help provide greater predictability, simplify schedule management, and reduce costs.

Comprehensive Electrical Services

- » Complete electrical distribution systems
- » Building information modeling
- » Preconstruction services
- » Prefabrication
- » Emergency power
- » Building, plant, and site lighting
- » Roadway lighting, traffic signalization, and intelligent traffic systems
- » Light rail transit power
- » Audiovisual systems
- » Fire alarm systems
- » Life safety
- » Security
- » Services and special projects
- » Preventive maintenance
- » Voice and data communications
- » 24/7 mission-critical facility service
